New Fire Door Inspection -

Fire Door Checklist

1. Can it be visually confirmed that the door is fire rated by suitable label located on the top or side of door? *

| Yes | No | N/A |

2. If there is no label then can it be confirmed by investigation that the door is suitable to be used as a fire door? *

| Yes | No | N/A |

Leaf and Frame

3. Is the door and frame free from damage including dents, open joints, chips and holes? This is to include any removed old locks, latches, keeps or

---

Fire safety done right

Complete accurate and thorough inspections to keep your buildings compliant and its occupants safe at all times.

Mobiess offers a paper-free way for you and your team to manage your auditing and reports with efficiency and accuracy.

Immediately identify and assess potential risks with full photographic evidence, create action plans to reduce the risk of fire-related danger in a building. Generate additional notes and view our high quality reports on our web-portal.

To get you started, we offer a set of preconfigured inspection templates that you can use immediately with your team.

Fire Risk Assessments

Manage your risk assessments, capture consistent data, streamline how you log actions and capture evidence.

Fire Door Inspections

Inspect your fire doors, log actions, photos, notes and build quality and accurate fire door asset registers.

Fire Stopping Surveys

Streamline your fire compartmentation surveys, which play a vital role in limiting the spread of fires.

Trusted by organisations of all sizes

EQUANS · mitie · Ligtas · SKANSKA · cds

Benefits

Mobiess

Go Paperless

Streamline your inspection process, save time, organise your data, and eliminate paperwork, all whilst reducing costs.

Capture Photos

Audits can be stored with photographic evidence and annotations on photos to highlight any issues you capture during inspections.

Reporting

Visit our web-based portal to view performance and trends in your real-time dashboards and high quality reports.

Manage Actions

Refine your action logging and reduce human error by utilising configurable prepopulated action picklist options. Manage locally on devices or on the portal.

Works Offline

Mobiess utilises offline data collection & secure storage if no network connection is available. **No connection? No problem!**

Data Quality

Transform how your teams capture data on site. **Improve productivity, data quality, accuracy and consistency.**

Create Corrective Action	
DETAILS	PICTURES
Category:	Remedial ⊗
Description:	Lack of documentation – No supporting documentation available to verify fire door specification (e.g., test certification). ⊗
Date Reported:	23 Dec 2025 ⊗
Date Due:	06 Feb 2026 ⊗
Impact:	Major ⊗
Probability:	High ⊗
Location:	Tudor House, First Floor, Boardroom, FD000089

Never under-report again

Ensure your teams are reporting properly and addressing remedial actions, hazards and potential risks - collect the data your organisation actually needs.

Our fire safety module has various ways you can export and view your data on the web-portal, straight out of the box. Capture the right data, generate the right reports.

- Fire Risk Assessment report (per site)
- Fire Compartmentation report (per site)

- Individual detailed fire door inspection report (per asset)
- Multi-door building-based report (per site)
- Corrective action summary reports (per project or per site)
- Corrective action raw data export (excel/csv)
- Export of all door asset attribute, location and condition data

Survey Templates

Mobiess
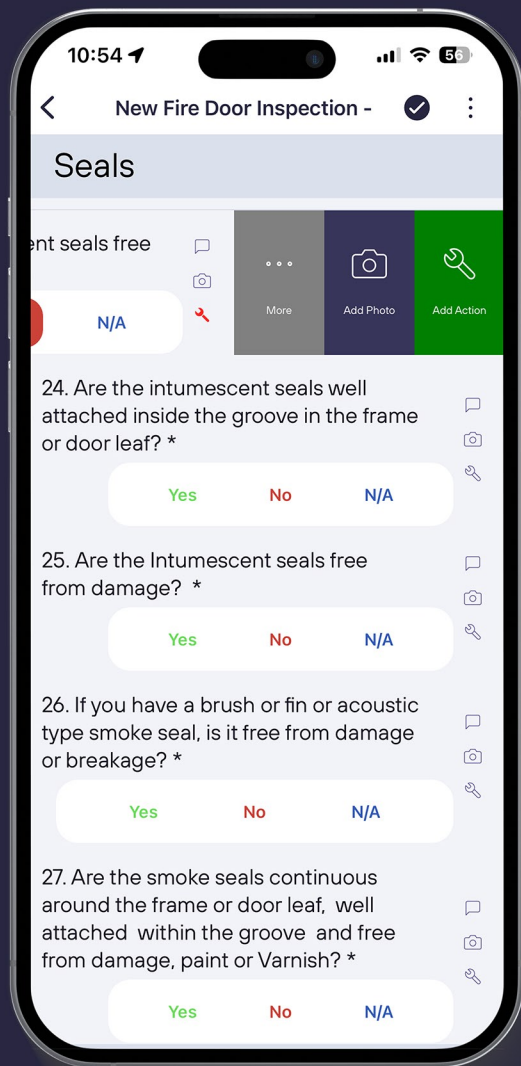

Fire Door Inspections

Create and maintain an accurate fire door register and inspect fire doors comprehensively to make sure standards and safety are maintained.

Our standard template drives checks for:

- Correct fire rating for the location
- Door, frame, and securing wall.
  Correct fitting of closures, hinges and other ironmongery.
- Compliance of door gaps
- Compliance of strips and intumescentseals.
- Correct glazing is used and fitted appropriately.
- Any damage on the fire door.

Mobiess supports various standards (BM Trada etc) and offers a comprehensive set of 35+ preconfigured checklist questions as default - giving customers a foundation to work from, or get started inspecting fire doors immediately.
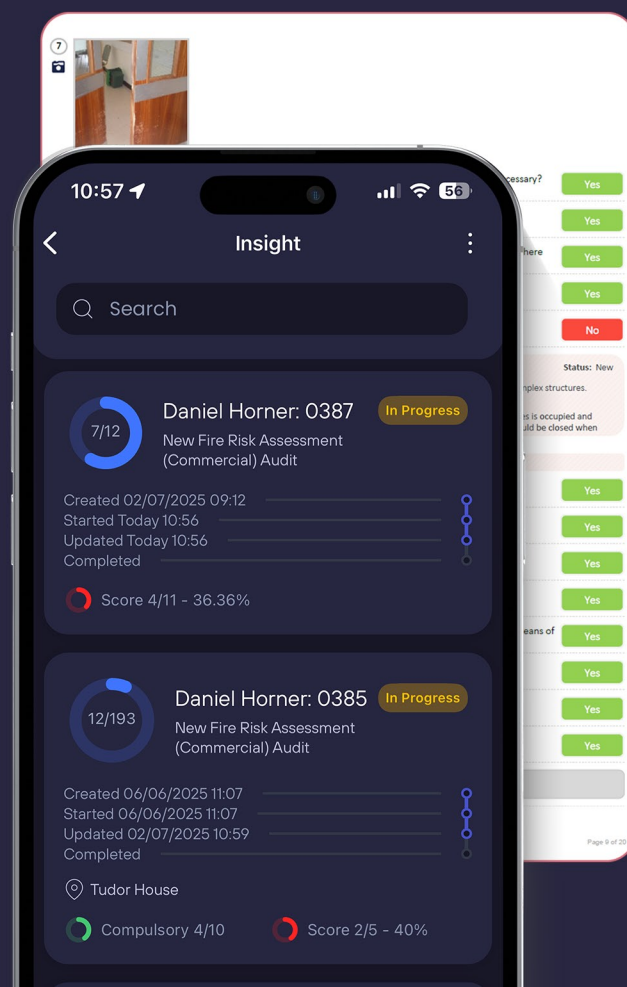

Need customisation? No problem →

Fire Risk Assessments

Our easy to use mobile platform allows you to streamline how you conduct Fire Risk Assessments on both iOS and Android devices.

Answer questions with the tap of a finger and preselect (configurable) picklist answers for text-based questions and actions. Add photographs, additional notes and remedial actions against any question and capture data with consistency, improving the quality of your reports.

View your automatically generated reports on our desktop web-portal, displaying all questions, answers, photographs and actions in a high quality, stylised PDF format.

Demonstrate fire safety compliance at an affordable cost, whilst eliminating the need for manual paperwork, saving time and organising your data.
