# FIRE SAFETY APP

mobiess
FM MOBILE ESSENTIALS

Mobiess Fire Safety is a data collection platform which streamlines the process of completing Fire Risk Assessments, Fire Door Inspections, Fire Compartmentation Surveys and Fire Evacuation Audits.

Fire Safety is a crucial tool for any facilities management team, enabling you to provide accurate and thorough inspections to keep buildings compliant and its occupants safe at all times. Mobiess offers a paper-free way for you and your facilities management team to manage your auditing and reports with efficiency and accuracy.

Immediately identify and assess potential risks with full photographic evidence, create action plans to reduce the risk of fire-related danger in a building. Generate additional notes and view our high-quality PDF reports on our web-portal.

FIRE RISK ASSESSMENT

Our comprehensive Fire Risk Assessment allows you to manage your legally required inspections in a consistent manner and streamlines compliance and communication within your team.

FIRE DOOR INSPECTION

Quickly and accurately build and maintain your Fire Door Register. The ability to add photographs, notes, and automatically generate corrective actions, help keep your buildings compliant at all times.

FIRE COMPARTMENTATION

Streamline your fire compartmentation surveys, which should play a vital role in your overall fire strategy and is fundamental to limiting the spread of a fire in properties, potentially saving lives.

FIRE EVACUATION AUDIT

Our Fire Evacuation Procedures Audit allows you to maintain well-executed fire escape procedure which is vital and will greatly reduce the risk of injury or harm in a fire.

FM MOBILE ESSENTIALS

GO PAPERLESS

Streamline your inspection process, save time, organise your data, and eliminate paperwork, all whilst reducing costs

PHOTOGRAPHS AND SKETCHES

Audits can be stored with photographic evidence and additional notes. Markup and annotate photos to highlight any issues captured during your inspections.

REPORTING AND ANALYTICS

Visit our web-based portal to view performance and trends in your real-time dashboards and automatically generated high-quality reports.

MANAGE CORRECTIVE ACTIONS

Generate and proactively manage corrective actions. Each corrective action can be logged, scheduled, and managed locally on the device or in the web-portal.

OFFLINE DATA CAPTURE

Mobiess Fire Safety utilises offline data collection and secure storage if no 3G/4G/Wi-Fi network are available. No connection? No problem!

MANAGE COMPLIANCE

Assess, manage, and react quickly to risks and achieve compliance while reducing administration costs.

EFFICIENCY & COMPLIANCE:

DEMONSTRATE FIRE SAFETY COMPLIANCE

CREATE ACTION PLANS FOR RESOLVING RISKS AND HAZARDS

SUPPORTED BY THE BRITISH STANDARD INSTITUTION (BSI)

EFFICIENT DATA COLLECTION

PROACTIVELY MANAGE RISKS

MAIN FEATURES:

PHOTO AND SKETCHES

MULTIPLE PROJECT SUPPORT

REPORTING AND ANALYTICS
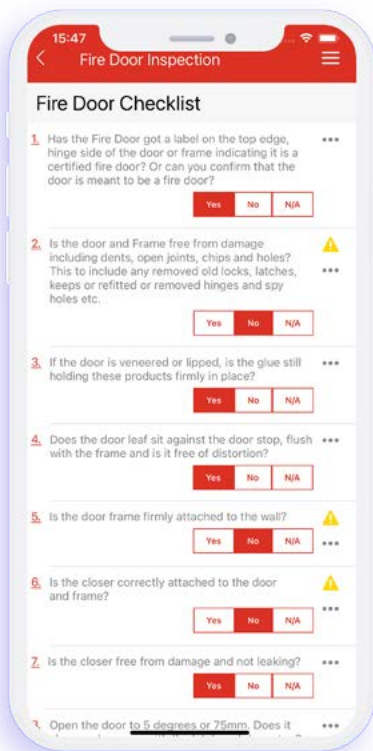

INSTANT DATA AVAILABILITY

REAL-TIME DASHBOARDS

FIRE RISK ASSESSMENT

Our easy-to-use Fire Risk Assessment Software allows you to streamline the way you carry out PAS 79: 2020 Fire Risk Assessments on both iOS and Android devices.

Answer questions with the tap of a finger, and add photographs, additional notes, or corrective actions against any question and enhance the way you complete your Fire Risk Assessments, collecting data with consistency and quality.

View your automatically generated reports, which displays all questions and answers, photographs and actions created on the device in high-quality, stylised PDF format. Our real-time dashboards allow you to analyse performance and trends.

Demonstrate fire safety compliance all at an affordable cost, whilst eliminating the need for manual paperwork, saving time, and organising your data.

FIRE DOOR INSPECTION

Create and maintain an accurate Fire Door Register and inspect fire doors comprehensively to make sure standards and safety are maintained.

Our software drives checks for:

- ✓ Correct Fire Rating for the location.
- ✓ Correct fitting of closures and hinges.
- ✓ Correct Gap measurements.
- ✓ Compliance of intumescent seals.
- ✓ Correct type of glazing is used and fitted correctly.
- ✓ Condition of the Fire Doors and any damages.

Ensure consistency across all inspections, and that risks are reduced. Reinforce this with full photographic evidence and any corrective actions, displaying your data in high quality PDF reports, which can be branded with your company logo.

No more wasted time, money, or effort – just the information you need right there at your fingertip.
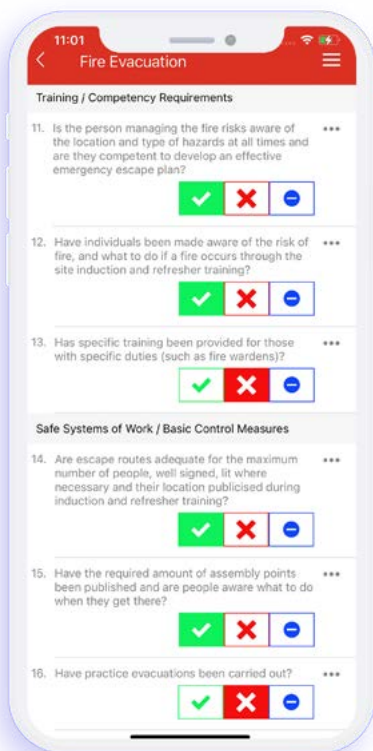

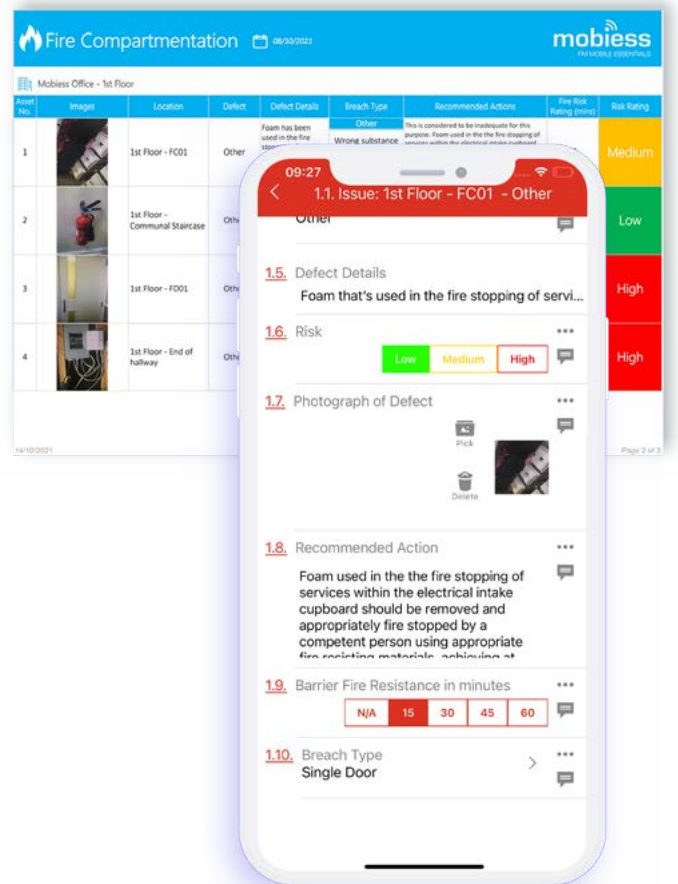

FIRE COMPARTMENTATION SURVEY

Effective Fire Compartmentation should inhibit and slow the rapid spread of smoke and fire within a building, protecting lives and property and play a critical role in checking the fire safety of a building.

Our software streamlines:

- ✓ Condition of existing fire stopping
- ✓ Effectiveness of seals, penetrations, and walls
- ✓ Inspection of the materials used and any damages present
- ✓ Reporting of unprotected structural steels
- ✓ Working condition of smoke and fire dampers
- ✓ Working condition of smoke vents and shafts

Whether you're collecting photographs or completing surveys, Mobiess allows you to simplify everything you do with only a smartphone or tablet. Empower your workforce and save time on reporting by populating our preconfigured templates with all the data you collect during a project. Streamline the way you manage the compliance of buildings, all whilst reducing costs.

FIRE EVACUATION AUDIT

Mobiess have created a detailed Fire Evacuation Audit that helps organisations meet their legal obligations. Our Fire Safety Audit Application allows you to identify and manage changes in your buildings and any additional training required for your staff.

As part of our Fire Safety range, the fire evacuation audit allows you to maintain well-executed fire escape procedures which is vital and will greatly reduce the risk of injury or harm in the case of a fire.

Streamline your inspection process by completing audits on your device, save time, organise your data, and eliminate paperwork, all whilst reducing administrative costs. Audits can be stored with photographic evidence and additional supporting information.

View trends and automated high-quality reports on our web-portal and use our audit checklist to uncover potential gaps in your safety plan that should be promptly addressed.
