

INSIGHT

Convert any paper checklists into smart, innovative digital forms with our mobile auditing solution and capture consistent data with ease.

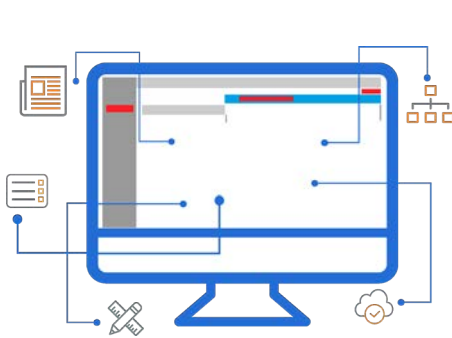

Mobiess Insight is a versatile, easy to use auditing system with an advanced, built-in drag & drop template designer.

Our powerful audit engine supports all standard response types like textboxes, numeric fields, dropdown lists, checkboxes, radio buttons, photographs, sketches, signatures and more.

Choose from our library of preconfigured templates or create your own data collection templates with ease, to suit your business requirements. Streamline the management of your compliance and auditing without the need for paper, and facilitate communication and collaboration on audits across organisational silos.

ENHANCE YOUR PAPERLESS DATA COLLECTION WITH 3 SIMPLE STEPS

1. DESIGN

Build your own custom surveys, safety inspections or checklists using our powerful form builder. Wide range of preconfigured digital forms are also available, providing a structured method of collection, storage and reporting.

2. INSPECT

Streamline your inspection process and collect your data in our advanced mobile application which fully supports both iOS, Android and allows offline access to forms and corrective actions.

3. DELIVER

Access all of your branded reports in our web-portal and visualize your data in dashboards. Edit previously completed audits and manage corrective actions.

Create custom question templates with unlimited complexity and structured levels with our easy to use, drag and drop survey template designer. Templates can be created for almost any kind of form, providing a robust method of data collection, storage, and reporting.

With support for all common data entry types, ensure that you create all the customised forms your organisation needs.

Build templates with intuitive logic to hide or show fields depending on previous answers. Add notes and pictures against each question and configure rules for driving conditional mandatory behaviour.

Templates can be saved as 'groups' so different users can only see audit types that are relevant to their role in an organisation, allowing you to manage and distribute surveys to only the necessary people.

Mobiess Insight incorporates a template publishing mechanism so that you can trial draft templates before issuing them to users and customers. Templates can be updated by cloning the latest version and published for distribution to all users, maintaining full backwards compatibility. Archiving previous copies helps manage clear version history and control.

MAIN FEATURES

GO PAPERLESS

Streamline your inspection process, save time, organise your data, and eliminate paperwork, all whilst reducing costs.

PHOTOGRAPHS AND SKETCHES

Audits can be stored with photographic evidence and additional notes. Markup and annotate photos to highlight any issues captured during your inspections.

REPORTING AND ANALYTICS

Visit our web-based portal to view performance and trends in your real-time dashboards and automatically generated high-quality reports.

CUSTOMISABLE FORMS

Insight's powerful audit engine supports all standard response types: textboxes, numeric fields, dropdown lists, checkboxes, photographs, radio buttons, barcodes, GPS location, signatures and more.

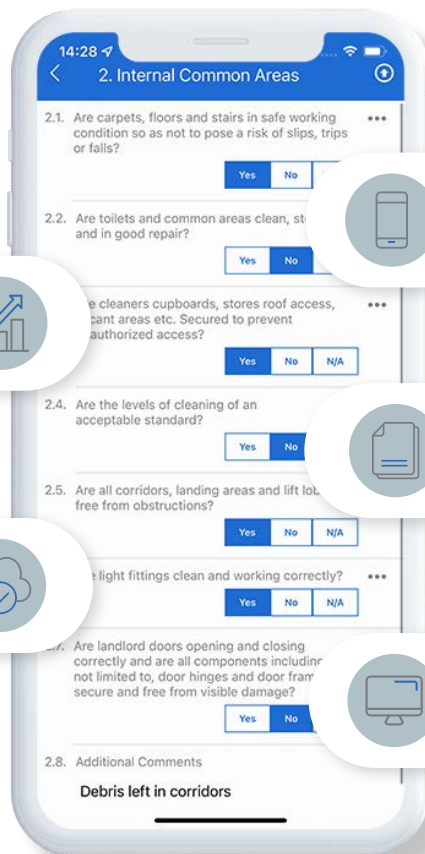

OFFLINE DATA CAPTURE

Mobiess Insight utilises offline data collection and secure storage if no 3G/4G/Wi-Fi network are available. No connection? No problem!

LOGIC

Create surveys that are more efficient and easier to complete by showing or hiding fields based on an answer. Each question can have notes, pictures, and conditional based rules for driving mandatory behaviour.
